Annual Maintenance

KNEST platform + KIIT Lab Booking — 12-month support & maintenance

PROPOSAL NO. KNEST/AMC/2026-27/001	ISSUED 10 September 2026	VALID UNTIL 10 October 2026	ANNUAL FEE ₹48,000
---------------------------------------	-----------------------------	--------------------------------	-----------------------

BILLED TO

KNEST
KIIT Nest — Innovation & Entrepreneurship Ecosystem
Kalinga Institute of Industrial Technology
Patia, Bhubaneswar, Odisha — 751024
India
Attn: «Name, Designation»

PROPOSED TERM

01 October 2026 — 30 September 2027
Twelve months, beginning the day the 30-day post-launch defect window on invoice KNEST/2026-27/001 ends, so there is no gap in cover.

Renewable annually by mutual consent, with any revision capped at 10% of the then-current fee.

Why this contract exists

What is live is not one website. It is a public platform holding real applicant documents, and a booking system that decides who gets physical access to KIIT labs — running across nine AWS services and Cloudflare. Software of that shape does not stand still. Security advisories are published against its dependencies, AWS deprecates runtimes, Android and iOS releases break camera and offline behaviour in progressive web apps, intake cycles bring new programmes and new questions, new labs come online each term, and databases need looking after.

This contract covers all of it at a fixed annual fee, so KNEST is not negotiating a price every time something needs attention — and so there is a named person accountable when a student cannot get into a lab at nine in the morning.

The fee is 39% of the ₹1,23,200 delivered scope — within the customary 15–40% band for annual maintenance on a platform of this size, and it covers both platforms, not just the website.

Scope of maintenance & charges

#	COVERAGE AREA	ANNUAL (₹)
Cloud Infrastructure Operations Running the named AWS and Cloudflare services the platform sits on.		
01	AWS Amplify Hosting operations Build pipeline health, deployments and rollbacks, preview environments, and framework runtime upgrades as Amplify deprecates older ones.	₹3,200
02	Amazon RDS administration Automated backups and point-in-time recovery verified by real restore drills, plus parameter tuning, storage growth review, index and vacuum health, and minor-version upgrades.	₹3,200
03	S3, CloudFront & SES operations Storage lifecycle rules, CDN cache and invalidation, and mail deliverability — bounce and complaint rates, DKIM and DMARC monitoring.	₹2,400
04	Cloudflare edge management DNS records, TLS renewal, WAF rule tuning against real traffic, and review of anything the DDoS protection stops.	₹2,400
05	CloudWatch monitoring & incident response Alarm tuning, log retention, alert triage, and a written note on anything that caused downtime.	₹3,000
Subtotal — Cloud Infrastructure Operations		₹14,200

#	COVERAGE AREA	ANNUAL (₹)
Security & Compliance The platform holds student data and gates physical access to labs.		
06	Security patch management Advisory monitoring across Next.js, Payload, PostgreSQL, the AWS services and every dependency, with impact triage and out-of-cycle patching for anything critical.	₹3,400
07	Anti-abuse tuning Cloudflare Turnstile and rate-limit thresholds adjusted against real traffic, so genuine students are not blocked and bots still are.	₹1,800
08	Credential & access management IAM and Secrets Manager rotation, staff access reviews, and prompt offboarding when lab staff or admins change.	₹2,000
09	Annual security review Dependency audit, AWS and Cloudflare configuration review, and a written findings report with a prioritised remediation list.	₹2,800
Subtotal — Security & Compliance		₹10,000
Application Support Ongoing support per module, across both platforms.		
10	Accounts, roles & CMS support Account recovery, role and permission changes, content-type and field adjustments, and support for the staff who publish.	₹2,600
11	Public website content operations New sections, page updates and layout adjustments within the existing design system.	₹2,400
12	Applications & review workflow Question-set updates ahead of each intake cycle, reviewer workflow changes, and cycle-open support when volume spikes.	₹2,800
13	Lab booking operations Lab and slot configuration, term calendars and blackout dates for holidays, exams and maintenance, assistant rosters, and onboarding new labs as they come online.	₹3,000
14	QR ticketing & PWA upkeep Scanner compatibility as Android, iOS and browser releases change camera and service-worker behaviour, plus install and offline behaviour.	₹2,400
15	Notifications, email & analytics Template changes, notification rules, and funnel and report definition updates as programmes change.	₹1,800
Subtotal — Application Support		₹15,000
Service Level & Included Changes Response commitments and a bundled budget for small changes.		
16	Defect resolution Unlimited Priority 1 and Priority 2 defect fixes within the response times set out below, at no additional charge.	₹3,200
17	Included change budget 16 engineering hours a year for small enhancements — copy, fields, filters, layout tweaks, report changes. Unused hours do not carry over.	₹3,200
18	Annual audit, documentation & training One accessibility and performance audit a year with a written report, documentation kept current, and a refresher session for staff editors, reviewers and lab heads.	₹2,400
Subtotal — Service Level & Included Changes		₹8,800
Subtotal (18 coverage areas)		₹48,000
GST		Not applicable
Annual maintenance fee		₹48,000

Rupees Forty-Eight Thousand Only · ₹4,000 per month equivalent

Service levels

PRIORITY	WHAT IT MEANS	RESPONSE	TARGET RESOLUTION
P1 — Critical	Site down, sign-in broken, applications cannot be submitted, lab check-in or QR scanning failing at the lab door, or a data/security incident.	4 business hours	1 business day
P2 — High	A module is unusable or wrong, but a workaround exists — a broken review action, a failing upload.	1 business day	3 business days
P3 — Normal	Cosmetic issues, minor content or copy corrections, small requests.	3 business days	Next release cycle
P4 — Change	Enhancements drawn from the included 16-hour annual change budget.	3 business days	Scheduled, by agreement

Support window: Monday to Saturday, 10:00–19:00 IST, excluding public holidays. Requests are raised by email; P1 incidents may additionally be raised by phone or WhatsApp at any hour. Response times run from within the support window. Release cycle: one scheduled maintenance release each month, plus out-of-cycle releases for P1 and security fixes.

Billing options

OPTION	SCHEDULE	PER INSTALMENT	ANNUAL TOTAL
Annual, in advance — recommended	One payment at the start of the term	₹48,000	₹48,000
Quarterly	Four payments, each in advance of the quarter	₹12,000	₹48,000

Both options carry the same total and the same cover; quarterly exists purely to suit institutional budget cycles. Payment terms are 15 days from each invoice.

Outside this contract

Charged separately

- Enhancement work beyond the included 16 hours a year, at **₹700 per hour**, estimated and approved in writing before work starts.
- New modules or significant features — quoted per module, on the same basis as the development invoice.
- Visual redesign or rebranding beyond the existing design system.
- Migration off AWS Amplify or RDS to a different provider or architecture.
- Scanner hardware, tablets or printed QR signage for lab desks.
- Content writing, photography, data entry and bulk data imports.

Not covered

- AWS and Cloudflare service charges, billed by those providers directly to KNEST.
- Domain registration and renewal, which KNEST holds and pays for directly.
- Faults caused by changes made to the code or infrastructure by anyone other than the supplier.
- Loss or corruption caused by KNEST staff actions in the admin console — recovery is chargeable at the hourly rate above.
- Outages attributable to AWS, Cloudflare or another provider, beyond triage, escalation and reporting.

Infrastructure — indicative annual cost to KNEST

These are billed by AWS and Cloudflare directly to KNEST and form no part of the fee above. Ranges are indicative for expected first-year load in ap-south-1 (Mumbai): the low end assumes the 12-month AWS free tier and Cloudflare's free plan, the high end assumes paid tiers once traffic, stored documents and mail volume grow. Confirm against the AWS Pricing Calculator before budgeting — AWS prices in USD, so the rupee figure moves with the exchange rate.

SERVICE	PURPOSE	INDICATIVE PER YEAR
Domain name	Public address for the platform	Held & paid by KNEST
AWS Amplify Hosting	Build minutes, hosting and server-side rendering	₹0 – ₹18,000
Amazon RDS for PostgreSQL	Content, accounts, applications, bookings	₹0 – ₹30,000
Amazon S3 & CloudFront	Applicant documents, media storage and delivery	₹1,500 – ₹12,000
Amazon SES	Verification, notification and booking mail	₹0 – ₹4,000
AWS Secrets Manager	Credential storage for the application	₹1,000 – ₹2,000
Amazon CloudWatch	Logs, metrics and alarms	₹0 – ₹6,000

SERVICE	PURPOSE	INDICATIVE PER YEAR
Cloudflare	DNS, TLS, WAF, DDoS protection, Turnstile	₹0 – ₹22,000

Realistic first year: near zero. The AWS free tier and Cloudflare's free plan cover launch volumes for this platform, and Turnstile is free to one million challenges a month. Costs begin once the free tier expires at twelve months. Watching that boundary, warning KNEST before it is crossed, recommending when to move up a tier, and doing the move, are all included in the maintenance fee.

Terms

- **Term.** Twelve months from 01 October 2026, renewable by mutual consent. Any renewal increase is capped at 10% of the then-current fee.
- **Termination.** Either party may terminate with 30 days' written notice. On termination, fees for the unexpired period are refunded pro rata, less any enhancement work already delivered.
- **Handover on exit.** All source code, credentials, documentation and data export are handed over within 14 days of termination, at no charge.
- **Ownership.** KNEST owns the source code and all data. The supplier retains no rights over either, and may reference the project as portfolio work unless KNEST asks otherwise in writing.
- **Confidentiality.** Applicant and member data is confidential, accessed only where necessary to deliver support, and never copied out of the production environment except for a documented, secured backup restore.
- **Continuity.** If the supplier is unable to continue, an orderly handover of at least 30 days is provided, including documentation and a working session with any incoming team.
- **Liability.** The supplier's aggregate liability under this contract is limited to the annual fee paid.
- **Escalation.** Anything unresolved past its target resolution time is escalated to the named KNEST point of contact with a written explanation and a revised commitment.

Acceptance

To accept, sign below and return one copy. An invoice for the selected billing option is raised on acceptance, and cover begins on 01 October 2026.

Billing option selected	☐ Annual ☐ Quarterly	KNEST point of contact	«Name»
