Annual Maintenance

KNEST platform + KIIT Lab Booking — 12-month support & maintenance

PROPOSAL NO. KNEST/AMC/2026-27/001	ISSUED 10 September 2026	VALID UNTIL 10 October 2026	ANNUAL FEE ₹96,000
--	------------------------------------	---------------------------------------	------------------------------

BILLED TO KNEST KIIT Nest — Innovation & Entrepreneurship Ecosystem Kalinga Institute of Industrial Technology Patia, Bhubaneswar, Odisha — 751024 India Attn: «Name, Designation»	PROPOSED TERM 01 October 2026 — 30 September 2027 Twelve months, beginning the day the 30-day post-launch defect window on invoice KNEST/2026-27/001 ends, so there is no gap in cover. Renewable annually by mutual consent, with any revision capped at 10% of the then-current fee.
---	---

Why this contract exists

What is live is not one website. It is a public platform holding real applicant documents, and a booking system that decides who gets physical access to KIIT labs — running across eight AWS services and Cloudflare. Software of that shape does not stand still. Security advisories are published against its dependencies, AWS deprecates runtimes, Android and iOS releases break camera and offline behaviour in progressive web apps, intake cycles bring new programmes and new questions, new labs come online each term, and databases need looking after.

This contract covers all of it at a fixed annual fee, so KNEST is not negotiating a price every time something needs attention — and so there is a named person accountable when a student cannot get into a lab at nine in the morning.

Why this is not a percentage of the build price

Maintenance contracts are often quoted as 15–40% of what the build cost. That convention only works when the build was priced at market. This one was not: it was written by a KIIT student for KIIT, at a flat ₹200 an hour against a market band of ₹1,000–₹1,800. Taking a percentage of an already-conceded price would set the maintenance fee by an accident of who built it, rather than by the work involved.

So this fee is built the way the invoice was — from hours. 480 hours across the year, itemised below, at the same flat ₹200 an hour. Nothing is derived from the build price, and the concession granted there is not quietly recovered here: the same rate applies to both.

₹8,000 A month, fixed, for two platforms and nine cloud services	15% Of what one in-house developer costs a year, fully loaded	480 hrs Committed engineering cover, roughly 9 hours a week	24 hrs Enhancement work included before anything is chargeable
--	---	---	--

COVER AT MARKET RATE ₹4,80,000 480 hours a year at ₹1,000/hr, the agency floor	KNEST PAYS ₹96,000 ₹8,000 a month — about ₹263 a day, at the same flat ₹200/hr as the build	KNEST SAVES ₹3,84,000 80% below the market floor, every year
---	--	---

Scope of maintenance & charges

Priced by coverage area on the same basis as the development invoice — estimated hours at the same flat ₹200 per hour — with no area repeating another. 480 hours across the year, roughly 9.2 hours a week. Amounts in Indian Rupees, for the full 12-month term.

#	COVERAGE AREA	HRS/YR	AT MARKET	YOUR PRICE (₹)
Cloud Infrastructure Operations Running the named AWS and Cloudflare services the platform sits on.				
01	AWS Amplify Hosting operations Build pipeline health, deployments and rollbacks, preview environments, and framework runtime upgrades as Amplify deprecates older ones.	20	₹20,000	₹4,000

#	COVERAGE AREA	HRS/YR	AT MARKET	YOUR PRICE (₹)
02	Amazon RDS administration Parameter and storage tuning, index and vacuum health, connection and slow-query review, storage growth forecasting, and minor-version upgrades applied in a maintenance window rather than by surprise.	22	₹22,000	₹4,400
03	S3, CloudFront & SES operations Storage lifecycle rules, CDN cache and invalidation, and mail deliverability — bounce and complaint rates, DKIM and DMARC monitoring, and reputation repair if a send goes wrong.	16	₹16,000	₹3,200
04	Cloudflare edge management DNS records, TLS renewal, WAF rule tuning against real traffic, and review of anything the DDoS protection stops.	15	₹15,000	₹3,000
05	CloudWatch monitoring & alerting Alarm tuning, log retention, dashboard upkeep, alert triage, and a written note on anything that caused downtime.	17	₹17,000	₹3,400
06	Disaster recovery & restore drills Two full documented restore drills a year against a live copy, proving the backups actually restore and recording how long it takes — because an untested backup is not a backup.	15	₹15,000	₹3,000
07	AWS cost management Monthly spend review, right-sizing, and advance warning before the free tier expires at month thirteen, so the first real bill is planned rather than discovered.	14	₹14,000	₹2,800
	Subtotal — Cloud Infrastructure Operations	119	₹1,10,000	₹23,800
Security & Compliance The platform holds student records and gates physical access to labs.				
08	Security patch management Advisory monitoring across Next.js, Payload, PostgreSQL, the AWS services and every dependency, with impact triage and out-of-cycle patching for anything critical.	22	₹22,000	₹4,400
09	Anti-abuse & Turnstile tuning Cloudflare Turnstile and rate-limit thresholds adjusted against real traffic, so genuine students are not blocked and bots still are.	14	₹14,000	₹2,800
10	Credential & access management IAM and Secrets Manager rotation, staff access reviews each semester, and prompt offboarding when lab staff or admins change.	14	₹14,000	₹2,800
11	Annual security review Dependency audit, AWS and Cloudflare configuration review, authorisation-boundary testing, and a written findings report with a prioritised remediation list.	18	₹18,000	₹3,600
12	Data protection & audit-log review Periodic review of who accessed applicant documents and privileged records, retention enforcement, and support for any data request KIIT has to answer.	14	₹14,000	₹2,800
	Subtotal — Security & Compliance	82	₹82,000	₹16,400
Application Support Ongoing support per module, across both platforms.				
13	Accounts, roles & permissions Account recovery, role and permission changes, sign-in investigations, and staff onboarding and offboarding.	15	₹15,000	₹3,000
14	CMS & editorial support Content type and field adjustments, editor assistance, and help for the staff who publish.	16	₹16,000	₹3,200
15	Public website content operations New sections, page updates and layout adjustments within the existing design system.	16	₹16,000	₹3,200
16	Applications & review workflow Question-set updates ahead of each intake cycle, reviewer workflow changes, and configuration for every new programme opened.	22	₹22,000	₹4,400
17	Lab booking operations Lab and slot configuration, term calendars and blackout dates for holidays, exams and maintenance, assistant rosters, and onboarding each new lab as it comes online.	24	₹24,000	₹4,800

#	COVERAGE AREA	HRS/YR	AT MARKET	YOUR PRICE (₹)
18	QR ticketing & PWA compatibility Scanner and offline behaviour re-verified against new Android, iOS and browser releases, which change camera and service-worker rules without warning.	18	₹18,000	₹3,600
19	Notifications, email & analytics Template changes, notification rules, deliverability monitoring, and funnel and report definition updates as programmes change.	14	₹14,000	₹2,800
Subtotal — Application Support		125	₹1,25,000	₹25,000
Service Desk & Response A named channel and a committed response, not best effort.				
20	Priority 1 & 2 defect resolution Unlimited P1 and P2 fixes within the response times set out below, at no additional charge, however many arise.	24	₹24,000	₹4,800
21	Support desk A named channel for KNEST staff and lab heads, with acknowledged response inside the support window rather than mail into a void.	18	₹18,000	₹3,600
22	Intake-cycle surge support Extended cover through application windows and the opening weeks of each semester, when load and question volume both spike.	15	₹15,000	₹3,000
23	Monthly release cycle One scheduled release a month with regression checks and rollback readiness, so changes ship predictably instead of accumulating.	18	₹18,000	₹3,600
Subtotal — Service Desk & Response		75	₹75,000	₹15,000
Included Changes, Assurance & Reporting Work bundled into the fee before anything becomes chargeable.				
24	Included enhancement budget 24 engineering hours a year for small enhancements — copy, fields, filters, layout tweaks, report changes, new content sections. Unused hours do not carry over.	24	₹24,000	₹4,800
25	Annual accessibility & performance audit One full audit a year against WCAG 2.1 AA and performance targets across both platforms, with a written report and a remediation list.	16	₹16,000	₹3,200
26	Quarterly service reporting A short written report each quarter: uptime, incidents and their causes, support volume, platform usage and cloud spend — the evidence KNEST needs to renew or to justify the platform internally.	15	₹15,000	₹3,000
27	Documentation upkeep Architecture, content-editing and lab-operations documentation kept current as the platform changes.	12	₹12,000	₹2,400
28	Training sessions Two sessions a year for staff editors, reviewers and lab heads, including any new people who join.	12	₹12,000	₹2,400
Subtotal — Included Changes, Assurance & Reporting		79	₹79,000	₹15,800

Annual maintenance fee

₹96,000

Rupees Ninety-Six Thousand Only · ₹8,000 per month equivalent

Service levels

PRIORITY	WHAT IT MEANS	RESPONSE	TARGET RESOLUTION
P1 — Critical	Site down, sign-in broken, applications cannot be submitted, lab check-in or QR scanning failing at the lab door, or a data/security incident.	2 business hours	Same business day
P2 — High	A module is unusable or wrong, but a workaround exists — a broken review action, a failing upload.	4 business hours	2 business days
P3 — Normal	Cosmetic issues, minor content or copy corrections, small requests.	1 business day	Next monthly release
P4 — Change	Enhancements drawn from the included 24-hour annual change budget.	1 business day	Scheduled, by agreement

Support window: Monday to Saturday, 09:00–20:00 IST, excluding public holidays, extended through intake windows and the opening weeks of each semester. Requests are raised through a named support channel; P1 incidents may additionally be raised by phone or WhatsApp at any hour, including Sundays. Response times run from within the support window. Release cycle: one scheduled release each month, plus out-of-cycle releases for P1 and security fixes.

Billing options

OPTION	SCHEDULE	PER INSTALMENT	ANNUAL TOTAL
Annual, in advance — recommended	One payment at the start of the term	₹96,000	₹96,000
Quarterly	Four payments, each in advance of the quarter	₹24,000	₹96,000

Both options carry the same total and the same cover; quarterly exists purely to suit institutional budget cycles. Payment terms are 15 days from each invoice.

₹263	480 hrs	28	nil
Per day, for a platform holding student records and gating lab access	Engineering cover a year, across two platforms and nine cloud services	Coverage areas, each priced and itemised separately	Licence and per-seat fees, at any number of users

What it costs not to have this. One intake window missed because sign-in broke, one morning of founders turned away from a lab because QR scanning failed, or one applicant's uploaded documents exposed — any of the three costs KNEST more, in reputation and in scramble, than the annual fee. Maintenance is not insurance against unlikely events; it is the work that stops likely ones.

Outside this contract

Charged separately

- Enhancement work beyond the included 24 hours a year, at **₹700 per hour**, estimated and approved in writing before work starts.
- New modules or significant features — quoted per module, on the same basis as the development invoice.
- Visual redesign or rebranding beyond the existing design system.
- Migration off AWS Amplify or RDS to a different provider or architecture.
- Scanner hardware, tablets or printed QR signage for lab desks.
- Content writing, photography, data entry and bulk data imports.

Not covered

- AWS and Cloudflare service charges, billed by those providers directly to KNEST.
- Domain registration and renewal, which KNEST holds and pays for directly.
- Faults caused by changes made to the code or infrastructure by anyone other than the supplier.
- Loss or corruption caused by KNEST staff actions in the admin console — recovery is chargeable at the hourly rate above.
- Outages attributable to AWS, Cloudflare or another provider, beyond triage, escalation and reporting.

Infrastructure — indicative annual cost to KNEST

These are billed by AWS and Cloudflare directly to KNEST and form no part of the fee above. Ranges are indicative for expected first-year load in ap-south-1 (Mumbai): the low end assumes the 12-month AWS free tier and Cloudflare's free plan, the high end assumes paid tiers once traffic, stored documents and mail volume grow. Confirm against the AWS Pricing Calculator before budgeting — AWS prices in USD, so the rupee figure moves with the exchange rate.

SERVICE	PURPOSE	INDICATIVE PER YEAR
Domain name	Public address for the platform	Held & paid by KNEST
AWS Amplify Hosting	Build minutes, hosting and server-side rendering	₹0 – ₹18,000

SERVICE	PURPOSE	INDICATIVE PER YEAR
Amazon RDS for PostgreSQL	Content, accounts, applications, bookings	₹0 – ₹30,000
Amazon S3 & CloudFront	Applicant documents, media storage and delivery	₹1,500 – ₹12,000
Amazon SES	Verification, notification and booking mail	₹0 – ₹4,000
AWS Secrets Manager	Credential storage for the application	₹1,000 – ₹2,000
Amazon CloudWatch	Logs, metrics and alarms	₹0 – ₹6,000
Cloudflare	DNS, TLS, WAF, DDoS protection, Turnstile	₹0 – ₹22,000

Realistic first year: near zero. The AWS free tier and Cloudflare's free plan cover launch volumes for this platform, and Turnstile is free to one million challenges a month. Costs begin once the free tier expires at twelve months. Watching that boundary, warning KNEST before it is crossed, recommending when to move up a tier, and doing the move, are all included in the maintenance fee.

Terms

- **Term.** Twelve months from 01 October 2026, renewable by mutual consent. Any renewal increase is capped at 10% of the then-current fee.
- **Termination.** Either party may terminate with 30 days' written notice. On termination, fees for the unexpired period are refunded pro rata, less any enhancement work already delivered.
- **Handover on exit.** All source code, credentials, documentation and data export are handed over within 14 days of termination, at no charge.
- **Ownership.** KNEST owns the source code and all data. The supplier retains no rights over either, and may reference the project as portfolio work unless KNEST asks otherwise in writing.
- **Confidentiality.** Applicant and member data is confidential, accessed only where necessary to deliver support, and never copied out of the production environment except for a documented, secured backup restore.
- **Continuity.** If the supplier is unable to continue, an orderly handover of at least 30 days is provided, including documentation and a working session with any incoming team.
- **Liability.** The supplier's aggregate liability under this contract is limited to the annual fee paid.
- **Escalation.** Anything unresolved past its target resolution time is escalated to the named KNEST point of contact with a written explanation and a revised commitment.

Acceptance

To accept, sign below and return one copy. An invoice for the selected billing option is raised on acceptance, and cover begins on 01 October 2026.

Billing option selected	☐ Annual ☐ Quarterly	KNEST point of contact	«Name»
Term begins	01 October 2026	Email	«email»
